Natural Gas Incentive Program

RMPU (5/2016)

Earn cash back by installing or converting to Natural Gas appliances.

The City of Rocky Mount Energy Resources department offers an incentive program to encourage homeowners, builders, developers, general contractors and restaurant owners to install natural gas appliances in new construction for residential, commercial and industrial buildings outside the City's electric territory. New construction includes additions and expansion projects that add new space to an existing structure. Customers converting or replacing an appliance to natural gas from a fuel source other than the City's electric system, such as propane, are also eligible for the incentive program.

Eligible Equipment

Natural gas equipment eligible for incentives include:

- New installation of: water heater when installed in combination with natural gas as the primary heating source, clothes dryer, cooking range and restaurant cooking equipment to include fryers, griddles, ovens, and/or steamers.
- Conversion or replacement of: water heater, heating system(s), clothes dryer, cooking range and restaurant cooking equipment to include fryers, griddles, ovens, and/or steamers.

Replacement of existing natural gas appliances served by the City are not eligible for this program.

Rebates

- New Heating/Water Heating (\$300)
- Range (\$50 per appliance)
- Clothes Dryer (\$50 per appliance)
- Conversion Heating (\$100 per appliance)
- Conversion Water Heating (\$200 per appliance)
- Restaurant Cooking Equipment (\$500 per appliance)

Application, Verification, & Payment Process

To qualify for this program, customers must first submit an application prior to the installation of the eligible equipment. Applications may be submitted in writing on the application included in this brochure, completed online at www.rockymountnc.gov/utilities or by calling (252) 972-1269.

The application form does not guarantee incentive payment, but informs Energy Resources of the customer's intent to install equipment that will qualify for the incentives.

The installation of eligible natural gas equipment will be verified at the time the gas division sets the gas meter. The meter can only be set after all natural gas equipment installations pass the required local inspection process. Once the meter is set and the eligible natural gas equipment installation is verified, the incentive payment check to the customer will be processed.

Natural Gas Incentive Program Application

Instructions: Fill in all fields, then mail to:
